What's Inside

Overview: The Big Picture	v
Contents: What's Inside	vii
Preface: The Color Management Conundrum	xix
Why Did We Do This?	xx
Understanding the Big Picture	xx
Sweating the Details	xxi
Making it Flow	xxi
Why Did We Think We Could Do This?	xxii
How the Book is Organized	xxii
Thank You!	xxiv
PART I Introduction to Color Management	1
CHAPTER 1 What Is Color: Reflections on Life	3
Where Is Color?	4
Light and the Color Event	6
Photons and Waves	6
The Spectrum	7
Spectral Curves	9
Light Sources	10
Illuminants	11
The Object and the Color Event	12
Reflection and Transmission	13

The Color of White	13
Fluorescence	15
The Observer and the Color Event	16
Trichromacy: Red, Green, Blue	16
Opponency: Red-Green, Blue-Yellow	22
Metamerism	25
Non-Linearity: Intensity and Brightness	30
Achromatic component: brightness	32
Sidebar: What's a Logarithm, and Why Should I Care?	33
Chromatic Components: Hue and Saturation	34
Measuring Color	37
We Cannot Truly Measure Color, Only Light	37
Densitometry	38
Colorimetry	40
Spectrophotometry	43
Where the Models Fail	45
Color Constancy	46
Psychological Factors: Color Names and Memory Colors	48
Lessons for Color Management	50
CHAPTER 2 Computers and Color: Color by the Numbers	51
Why CMYK?	53
Pixels, Dots, and Dithers	56
Digital Evolutions	57
How the Numbers Work	59
Why 256 Levels?	61
Millions of Colors	61
Why the Numbers Vary	63
Color Definitions and Colors	63
Colorants (Primaries)	64
White Point and Black Point	65
Tone Reproduction Characteristics	66
Device-Specific Color Models	67
Device-Independent Color Models	69
CIELAB	70
LAB Limitations	71
Mismatching—the Limits of the Possible	72
Device Limitations—Gamut and Dynamic Range	72
Alphabet Soup	73
Tone and Gamut Mapping	74
Color is Complex	78

CHAPTER 3	Color Management: How It Works	79
	The Genesis of Color Management	81
	The Components of Color Management	83
	The WYSIWYG Myth	83
	The PCS	84
	Profiles	84
	The ICC—Some Historical Perspective	85
	The CMM	86
	What Does CMM Stand For?	86
	Why Do We Need CMMs At All?	87
	Rendering Intents	88
	Color Management in Action	93
	Assigning and embedding profiles	93
	Converting With Profiles	94
	How Conversions Work	96
	Conversions and Data Loss	97
	The High-Bit Advantage	98
	Color Management Is Simple	98
CHAPTER 4	All About Profiles: Describing Devices	99
	What Are Device Profiles?	99
	Profile Classes	100
	Matrix-Based Vs. Table-Based ICC Profiles	102
	Stimulus and Response	104
	Profile Limitations	107
	Using Profiles—Source and Destination	108
	Generic Profiles	108
	Color Space Profiles	109
	Good Profiles	110
PART II	Building and Tuning Profiles	111
CHAPTER 5	Measurement, Calibration, and Process Control:	
	"The Map Is Not the Territory"	113
	Keeping Track of Device Drift	114
	Stimulus and Response	115
	Controlling Variables	115
	Controlling Variability	119
	The Multiple Roles of Measurement	119
	Evaluating Devices	120
	Calibrating Devices	121

Monitoring Devices	122
Working Outside the System	123
CHAPTER 6 Building Display Profiles: Your Window to Color	125
Display Calibration	126
What to Adjust	127
Calibration and Profiling Tools	128
Muddying the Waters	129
Instruments	131
Choosing Calibration Settings	132
Target White Point	133
Target Gamma	134
How Often Should I Calibrate?	135
Before Calibration	136
Warm-Up Time	136
Resolution, Refresh, and Other Monitor Settings	136
Cleaning the Screen	137
Precalibration—Setting the Analog Controls	137
Setting White Luminance	138
Setting Black Level	138
Setting the Color Temperature	140
Calibration and Profiling	142
Saving the Monitor Profile	144
Visual Calibration	145
Piece of Cake	146
CHAPTER 7 Building Input Profiles: Starting Out Right	147
Input Profile Basics	148
Input Profiling Targets	148
Input Device Variables	152
Building Scanner Profiles	153
Stabilizing the Scanner's Response	153
Optimizing the Scanner's Response	154
Scanning the Target	154
Building the Scanner Profile	156
Building Digital Camera Profiles	157
Controlling the Camera's Response	157
Capturing the Target	159
Building the Camera Profile	159
Starting Out Right	160

CHAPTER 8 Building Output Profiles: Final Destinations	161
The Moving Target and The Rubber Ruler	162
Measuring Instruments	163
Measurement geometry	163
Aperture size	165
Filters	165
Backing	166
Handheld instruments	166
XY plotters	168
Strip readers	169
Profiling Packages	169
Instrument Support	170
Profile Creation	171
Targets	173
Data Averaging	176
Linearization	176
Parameter Controls	177
Profile Editing	180
Getting Good Data	180
Opening and Printing the Target	181
Opening the Target	181
Printing the Target	182
Profiling RGB Inkjet Printers	183
Before Profiling RGB Inkjets	183
Comparing Colors	184
Creating RGB Inkjet Profiles	188
Profiling True RGB Printers	189
Before Profiling True RGB Printers	189
Creating True RGB Printer Profiles	190
Profiling Three-Color Dye-Sub Printers	190
Profiling Composite CMYK Printers	191
Before Profiling CMYK Color Laser Printers	192
Creating CMYK Color Laser Profiles	194
Black Generation	194
Ink Limiting	195
Before Profiling CMYK Inkjets	196
Creating CMYK Inkjet Profiles	196
Before Profiling Solid Ink Printers	197
Creating CMYK Solid Ink Printer Profiles	197
Before Profiling CMYK Dye-Sublimation Printers	198
Creating CMYK Dye Sublimation Printer Profiles	198

Profiling Printing Presses	199
Before Profiling Presses	200
Don't Profile the Press?!	200
Profile the Press Once	200
Intentionally Non-Linear	202
Optimized or Standardized Press Behavior	203
Creating Profiles for Presses	204
Profiling Multichannel Printers	205
Checking the Map	206
CHAPTER 9 Evaluating and Editing Profiles: Color Orienteering	207
Judging the Map	208
Viewing Environment	208
Surfaces	209
Lighting	210
Counting Photons	211
Evaluating Profiles	214
Checking the Display	215
Monitor Calibration	215
Monitor Profile	220
Measurements to Pixels and Back	222
Input Profiles	223
Basic Test for Input Profiles	224
Objective Test for Input Profiles	224
Objective Objectives	225
Subjective Tests for Input Profiles	234
Editing Input Profiles	238
Output Profiles	245
Objective Tests for Output Profiles	247
Subjective Tests for Output Profiles	251
Editing Output Profiles	252
Edit, Reprofile, or Update?	254
Profiling is Iterative	256
Where Do We Go From Here?	256
PART III Applications and Workflow	257
CHAPTER 10 Color-Management Workflow: Where the Rubber Meets the Road	259
What Is Color-Management Workflow?	260
Display Conversions	262
When to Convert	263

Early Binding Advantages	263
Early Binding Disadvantages	264
Late Binding Advantages	264
Late Binding Disadvantages	264
Avoiding Extremes	265
Intermediate Spaces	265
The Intermediate Space Advantage	268
Conveying Color Meaning	268
Embedded Profiles	268
Premature Binding	269
Terminology: Tagging, Assigning, Embedding, and Assuming	270
Assumed Profiles	271
Hybrid Workflows	272
Workflow Within a Program	273
Opening Untagged Documents	273
Opening Tagged Documents	274
Color Management Between Documents	275
Assigning, Converting, and Soft-Proofing	276
Soft-Proofing Basics	279
Printing and Proofing	280
Workflow Between Programs	283
Workflow Into and Out of Color Management	284
Bringing Color Into a Color-Managed Environment	284
When Color Management Starts	285
The Limits of the Knowable	287
Preparing Materials for a Non-Color-Managed Print Environment	288
Fear of Embedding	289
Preparing Materials for the Non-Color-Managed Internet	290
Internet Color Workflow	291
Understanding Workflow	291

CHAPTER 11 Color Management In the Operating System:

Who Does What To Whom, When?	293
Application-Level and OS-Level Color Management	293
ColorSync and ICM	295
What Are They? What Do They Do?	295
Mac OS 9	295
Mac OS X	299
Windows	302

xiv Real World Color Management

The Generics	303
Color Management in Applications	304
Color-Managed Applications	304
QuickDraw, GDI, and Quartz	305
Non-Color-Managed Applications	306
Color Management in Printer Drivers	306
Default Behavior	307
Source Profile Assumptions	308
Raster Drivers	308
CUPS	312
ColorSync Utility	313
PostScript Drivers	315
Color Management in Scanner Drivers	318
East Is East, West Is West	319

CHAPTER 12 The Adobe Common Color Architecture:

Color Management in Adobe Photoshop, InDesign, and Illustrator	321
Color Settings—Command Central for Color	322
Settings	323
Default Profiles—Working Spaces	324
Color Management Policies	324
Warnings—Manual Overrides	326
Advanced Options—Default Conversion Settings	334
Manual Assignments and Conversions	336
Assign Profile	337
Convert to Profile	338
Color Managing Imported Graphics	340
Placed Graphics in Photoshop	340
Placed Graphics in InDesign	340
Placed Graphics in Illustrator	342
Simulations and Soft-Proofing	345
Simulations in Illustrator	345
Simulations in InDesign	346
Simulations in Photoshop	347
Soft-Proofing Practices and Pitfalls	349
Printing	351
The Same, But Different	356

CHAPTER 13 Color Management In Macromedia FreeHand 10:

Capable But Quirky	357
FreeHand's Color Preferences	358

Color Management Types	358
Kodak Digital Science and Apple ColorSync	359
Manual Assignments	363
Object Palette	363
Exporting	364
TIFF	364
EPS and PDF	365
Printing	366
Gotchas	367
Be Careful	368

**CHAPTER 14 Color Management In CorelDRAW 10:
It Manages Everything But Its Own Files**

Color Management Preferences	370
Internal RGB	371
Monitor	372
Composite Printer	373
Import/Export	373
Scanner/Digital Camera	374
Separations Printer	374
Importing	375
Manual Controls	376
Exporting	377
Profile Embedding	378
Printing	378
Strengths and Weaknesses	380

CHAPTER 15 Color Management In QuarkXPress: Incremental Improvements ..

Turning It Off	382
Turn Off QuarkXPress 3 CMS (Mac OS Only)	382
Turn Off QuarkXPress 4 and 5 CMS	383
Built-in Color Management	383
QuarkXPress 4	383
QuarkXPress 5	384
Color Management Preferences	386
Manual Controls	390
Get Picture	390
Printing	391
Profile Information	391
Hard Proofing	394
Praxisoft Compass Pro XT	394

Compass Pro XT	395
The 800-Pound Gorilla	396
CHAPTER 16 Color Management and PDF: The Wave of the Future	397
The Flavors of PDF	398
PDF Versions	398
PostScript Color Management	399
PDF/X	401
Distiller 5	403
Compatibility	404
Color Settings	404
Making PDFs	408
Acrobat 5	410
Color Management Preferences	411
Printing	412
InDesign 2 Export PDF	414
PDF Styles	414
Export PDF	414
EPS Objects	416
Third-Party Stuff	417
Enfocus Pitstop Pro	417
Other Products	418
The Wave of the Future	418
CHAPTER 17 Automation and Scripting: The Smart Way to be Lazy	419
Why Automate?	419
Color Servers	420
Color Server Pros	421
Color Server Cons	422
Examples	423
Color Server Questions	426
Prepress Solutions	426
DeviceLink Profiles	427
Who Should Consider Prepress Solutions?	428
The Downsides	429
Examples	429
Important Questions	431
In-RIP Color Management	432
The Good	433
The Bad (and The Ugly)	433
Scripting	434

What is Scripting?	434
What Can Scripting Do?	434
Scripting Advantages	434
Scripting Disadvantages	435
Scripting Examples	436
The Automation Trade-Off	440
CHAPTER 18 Building Color-Managed Workflows: Bringing It All Together	441
The Four Stages of Color Management	442
Defining Color Meaning	443
Normalizing Color	444
Converting for Output	446
Proofing	447
Step-by-Step Color Management	448
Determining Your Needs	448
Software, File Formats, and Devices	448
What Outputs Do I Need?	449
Automation and Quality	451
Workflow Tools	452
Embedded or Assumed Profiles	452
Normalization and Editing Spaces	453
The Cop at the Door—Warnings	455
LAB—The Great Normalizer	455
Black Preservation and Device-Dependent Data	456
Named-Color Systems	456
Simulations and Soft Proofs	457
Hard Proofs	458
Output Conversions	459
Final Analysis	460
One Pixel's Journey	460
Capture a Pixel	460
Define the Color	461
Normalize the Color	462
Simulate the Output	462
Optimize for Output	463
Convert for Output	463
Proof the Output	464
Hand off the Color	464
The Devil Is in the Details	465

PART IV Appendices	467
Appendix A: Profile Anatomy	469
Appendix B: Workflow Templates	481
Glossary	491
Index	513
